PERFORMANCE TESTED BULL SALE

FRIDAY, MARCH 6, 2020 // 6:30 PM

WESTERN ILLINOIS UNIVERSITY LIVESTOCK CENTER // MACOMB, IL

OFFERING 40 ANGUS, SIMANGUS & SIMMENTAL BULLS

WESTERN ILLINOIS UNIVERSITY PERFORMANCE TESTED BULL SALE

FRIDAY, MARCH 6, 2020 // 6:30 PM // MACOMB, IL

SALE DAY SCHEDULE

3:00 PM Bulls may be viewed
5:00 PM Buyer Registration Opens
6:30 PM Sale Begins
The Sigma Alpha sorority will be operating a food stand from 5 p.m. until completion of the sale.

SALE DAY PHONE NUMBERS

Keela Trennepohl 805-440-8421
Delson Wilcoxon 309-338-1724
Chris Trennepohl 360-201-3699

AUCTIONEER

Monte Lowderman, *Lowderman Auction Service*
309-255-0110 or 309-833-5543

LOCATION

Western Illinois University Livestock Center

DIRECTIONS TO THE TEST STATION

From the north, come into Macomb on Hwy. 67. At the north edge of Macomb, just before you get to the city, turn right (west) onto Tower Road at the sign that points the direction to the WIU farm. Go one mile west and turn right (north) on the first road that goes north. Go about half mile to the top of the hill, turn right at the buildings, and the bull test station is about a quarter mile straight ahead.

From the west, come into Macomb on Hwy. 136 and turn left (north) onto Wigwam Hollow road at the first stop light (there's a Casey's at that turn). Follow Wigwam Hollow Road north through two curves and you'll come to a T intersection with Tower Road. Turn right (east) and then go back to the north at the first road to the north (about 100 yards). Go about half mile to the top of the hill, turn right at the buildings, and the bull test station is about a quarter mile straight ahead.

From the east and south, come into Macomb on either Hwy. 136 or 67 (they join at the east edge of Macomb and become Jackson St.), and follow Jackson through Macomb until Highway 67 splits to the north. Go north on Hwy. 67 past the Highway Patrol Station to Tower Road at the very north edge of Macomb. Turn left (west) at the sign that points the direction to the WIU Farm. Go one mile west and turn right (north) on the first road that goes north. Go about half mile to the top of the hill, turn right at the buildings, and the bull test station is about a quarter mile straight ahead.

BULL VIEWING

Bulls may be viewed at the livestock center after 3 PM on sale day and any other time at the bull testing facility prior to sale day.

BIDDING

Bidding will be by number. The auctioneer will settle and render a final decision on any disputes pertaining to bidding.

ABSENTEE BIDS

If you are unable to attend the sale and would like to place a bid, please contact Keela Trennepohl or Monte Lowderman at the listed numbers. All bids will be handled professionally and with confidence. You may also bid online at Lowderman Auction Options but must register 24 hours prior to the sale.

TERMS

Terms of sale are cash. CHECKS SHOULD BE MADE PAYABLE TO THE LOWDERMAN AUCTION SERVICE. All bulls must be paid for at the sale and before loading. All bulls are the buyer's risk as soon as sold. Announcements made from the auction block will take precedence over the printed material in this catalog.

REGISTRY AND TRANSFER

Registration papers will be transferred to the buyer at the seller's expense.

CONTRACT

The previous terms and guarantee shall constitute a contract between the buyer and the seller.

INSURANCE

Insurance may be obtained from representatives at the sale.

LIABILITY

All persons in attendance of the sale do so at their own risk. Western Illinois University and its employees assume no liability, legal or otherwise, for accidents which may occur.

LOADING

Bulls will be available to load out at the conclusion of the sale. Arrangements may be made to pick up the bull at a later date by contacting the station staff. Bulls will be housed and cared for by WIU bull test for up to 48 hours after the sale without additional charge.

HEALTH

All bulls were tested for brucellosis within 30 days of the sale. Additional health papers, acceptable in any state, will be furnished at the expense of the buyer. All bulls met the health requirements established by the test veterinarian, test advisory committee, and test coordinator before coming on test. Their dams tested free of Johnes. All bulls were tested negative for persistently infected (PI) BVD and anaplasmosis.

BREEDING GUARANTEE

All animals sold are guaranteed by the seller to be breeders. Bulls are guaranteed as long as they are properly cared for. Any bull that settles at least one-third of healthy cows he breeds will be considered a breeder. Should any bull not prove to be a satisfactory breeder within one year of the sale, the seller reserves the right, for a period of six months, to prove the bull a satisfactory breeder. Should the bull fail to prove a satisfactory breeder in the specified time period, the seller will refund the full settlement in satisfaction of all claims. Complaints must be reported in writing to the seller within one year of sale.

ACKNOWLEDGMENTS

WIU Staff: Jay Pittman, Paul Blome, Debbie Carithers, and Barb Woolam
WIU Farm Student Employees
WIU Beef Production Class & WIU Beef Team
Bull test management thanks all additional students who assisted to make the bull sale a success.

Western Illinois University

SCHOOL OF AGRICULTURE

Dear Valued Customers,

I would like to thank you for your interest in the 48th Annual 2020 WIU Performance Tested Bull Sale. Performance tests provide weaning to yearling comparison performance data among different breeders and genetics. Bulls are rigorously tested prior to arrival being negative for PI-BVD, anaplasmosis, and free of all known genetic defects. Their dams are also tested Johnes negative. They have been vaccinated properly with a respiratory (4-way), clostridal (7-way +somnus), and Pasteurella as well as dewormed for internal and external parasites. During the test, they received multi-min, dewormer, vaccinated for vibro and lep-to, and tested brucellosis free. They have also all passed a breeding soundness exam and have been ultrasound scanned for carcass information. They have received a high fiber ration complete with chelated minerals, biotin, yeast, and rumensin to ensure gain has been optimized and that they will be ready to breed cows. Also, the bulls had access to outdoor runs to keep them more active during development. I challenge you to find another bull developer that gives you the certainty that the WIU bull test does. These breeders have brought you their best bulls and WIU has given them the best care possible. We are continuously striving to be the best at what we do by making improvements and progressing with the cattle industry. I look forward to seeing you all on March 6th. Please call or email with any questions or if I can be of assistance when selecting your 2020 herd sires.

Keela Trennepohl, PhD
WIU Bull Test Advisor

Breeders, Fellow Cattleman and Friends,

I invite your inspection and welcome your attendance to this years Western Illinois University's annual bull test sale. For 48 years, this test, has assisted breeders, producers and cattlemen to identify and measure important performance traits, profit making indicators and value added genetic markers. Today, the demand for documented performance tested bulls and quality genetics is not only strong but important as ever.

For this years test, more emphasis was put on management and soundness, including foot quality; with a focus on getting the bulls in the right shape and condition to avoid melt down; without sacrificing performance. Also, 3-large exercise pens were built and all bulls on test had access to these. As a result, the bulls are more athletic and ready for service, and you can bid with confidence knowing that these bulls will go out and work.

Analyze your cow herd and your calf crop to identify those traits in which you need improvement. Use the valuable data provided by the WIU bull test, to assist in picking your next herd sire that possesses those traits that are needed to improve not only your calf crop, but your cow herd as well. Remember the bull you need may not be the same bull your neighbor needs to improve your bottom line. Choosing the right bull for your operation can make a \$20.00 to \$30.00 / CWT difference or more, when selling your calf crop, per year.

The Western Illinois University bull test has built a tradition and a relationship between producers / breeders, alumni and students for almost 5 decades; and in some cases 3 generations of a family.

As an Alumni of Western Illinois University, I'm proud to say that I have been associated with the WIU Bull test for the past 30 years. I have personally seen this sale grow, to become one of the well respected performance bull tests within the Midwest. Should you have any questions or need assistance, feel free to call Keela Trennepohl or my self. We look forward to seeing you at the sale.

Thank you in advance, for your consideration.

Monte W. Lowderman
Auctioneer, CAI.

ONLINE BIDDING. Sale will be broadcast live through Lowderman Auction Options at www.lao.live Please contact Cody Crum at 217-248-7282 with questions regarding viewing, registration, and bidding.

VIDEOS & ONLINE CATALOG. The sale catalog and videos will also be available for viewing online through their site, www.lao.live

EPD DEFINITIONS

Production, Maternal, and Carcass EPDS are listed for all breeds • Indices are breed specific

EPDs as printed in the catalog should only be compared within breed as they are not representative of an across breed EPD

PRODUCTION EPDS

CE/CED – Calving Ease Direct Predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers, with a higher value indicating greater calving ease.

BW/Brth – Birth weight Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WW – Weaning Weight Expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

YW – Yearling Weight EPD Expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

SC – Scrotal Circumference EPD Expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL EPDS

Milk – Maternal Milk A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires.

Stayability (STAY) – Percent of daughters remaining in the cowherd at 6 years of age.

CARCASS EPDS

Fat/BF – Fat Thickness, Expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib of a sire's progeny compared to progeny of other sires.

Marb – Marbling Expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

RE/REA – Ribeye Area EPD Expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

INDICIES

Simmental

API – All Purpose Index Dollars per cow exposed under an all-purpose-sire scenario. Evaluates sires for use on the entire cow herd (heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TI – Dollars per cow exposed under a terminal-sire scenario. Evaluates sires for use on mature cows with all offspring put on feed and sold under grade and yield.

Angus

\$M – Maternal Weaned Calf Value, an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

\$W – Weaned Calf Value An index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

\$B – Beef Value An index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

GENOMIC-ENHANCED EPDS

are the best estimate of an animal's genetic value as a parent combining all available sources of information. Genomics permit higher prediction accuracies for younger animals and characterizes genetics for traits where it's difficult to measure the phenotype.

BULL TEST OPERATION AND DATA COLLECTED

FACILITIES: The bulls had access to free choice hay and feed, covered shelter bedded with corn stalks, and 160' long outdoor runs.

TESTING PERIOD: The bulls began their 90-day test on November 4, 2010 after a 21-day adjustment period and came off of test on January 31, 2020.

RATION: Bulls were fed a complete pellet with a NEg of 0.495 Mcal/lb and 12% CP. The ration consisted of 73% highly digestible fiber sources (wheat middlings, soyhulls, and cottonseed hulls), 22% corn, and a vitamin-mineral premix with rumensin. This ration adds in developing bulls by optimizing gain without compromising breeding ability and foot quality.

ON/OFF TEST WEIGHTS: Weights are the average of two consecutive weights taken at the beginning and end of the bull test

ADG: Average Daily Gain over the entire test period. The test group ratio is also provided.

INDEXES: Calculated as 70% ADG + 15% REA + 15% IMF. Indexes were calculated within breed index.

FRAME SCORE: Based on hip height and age at hip height measurement using the BIF guidelines.

SCROTAL CIRCUMFERENCE: Measured in centimeters and adjusted using BIF guidelines. This trait is correlated to the bull's semen producing ability as well as the fertility and age of puberty of his offspring.

RUMP FAT & 12TH RIB FAT: Fat thickness in inches at the rump and between the 12th and 13th ribs measured using real-time ultrasound and adjusted using breed association and BIF guidelines. Note that some breeds do not report rump fat.

RIBEYE AREA: Ribeye area in square inches between the 12th and 13th ribs measured using real-time ultrasound and adjusted using breed association and BIF guidelines.

MARBLING: Marbling score estimated using real-time ultrasound and adjusted using breed association guidelines. Adjusted percent intramuscular fat is converted to a potential quality grade using BIF guidelines.

GENETIC DEFECTS: All bulls in the sale are free of known genetic defects at the time of test registration.

This bull features depth, stoutness, soundness, and docility with performance. He recorded the highest IMF in the Simmental Division. Our Heritage calves are the 2019 favorites. In fact, we retained all Heritage-sired heifers. WIU is excited to offer a superior individual with gain and carcass ability along with maternal strength.
