## Our learning adventures continue!

This week we had lots of fun out on the playground, soaking up the beautiful fall weather. We enjoy taking our class pets, the guinea pigs, outdoors with us. We observe them munching on grass, and we like to feed them clover that we find and pick for them. We also had kinesiology class in the gym this week with the college students. Some of the activity stations they had set up for us included an obstacle course, kicking balls to knock over pins, throwing beanbag animals into targets, and bopping balloons. In the classroom we have had fun playing with puppets and big books to re-tell stories we've read during morning meeting time. We were excited to have music time this week too!

**Lining up for motor development!**
